This research is the study and development of Information Systems Management for Dissertation/thesis of Srinakarintarawiro Graduate University. Objective for managing work and dissertation writing, using material developed in the web-based application(Web Application) to evaluate the efficiency and effectiveness and to assess user satisfaction with information systems for the management of the dissertation and thesis on the development of the principle of development of the SDLC (System Development Life Cycle) is used to develop the system. And requirements gathering analysis of existing systems to new systems for use in the management of information and writing dissertations. This system is divided into 3 groups are user groups, including faculty, staff and students. The results of the study found newly developed information system effective levelby evaluating the performance of expert systems remained strong with an average of 4.10 and 0.59 of standard deviation. The satisfaction of the samples using the system remained good. The average was 4.43 and the standard deviation of 0.51. The system developed can be applied to practical and responsive to the needs of users. (font size 16 pt) *(Use style iThesis_Normal 0.57)*
